AJAX (Request) timeout for mootools 1.2

Check it out:

<http://code.google.com/p/mootimeout/>

Posted by Stefan LH at 14:01

Great work!

Have you thought about submit the functionality back to MooTools itself?

Tim

I submitted it for their upcoming plugin repository.

Sorry, revoke my last comment.

It seems Request.JSON fires onSuccess no matter what happened; failure or timeout.
So there is no onTimeout with my modification previous mentioned.

Timeout timer does work though.
